

Ideally engineered for homes with small garden or indoor spaces, the PowerPool Sport model utilizes "filter-forward" construction and "radius-rectangular" design to provide the largest aquatic exercise and swim zone available in this size category.

While compact in size, the Sport model is built to the same exacting standards as all Coleman Spas® products and features Coleman Spas® unique Power-Force swim jet system, balance bar handrails, PowerStroke rowing and resistance exercise equipment, and physician designed hydrotherapy seating. Swimming, exercise, health and fitness; with PowerPool Sport, big things do come in small packages.
